Eastern and Foreign Markets—The downward tendency in the raw sugar market is still in evidence, and latest mail advices from New York under date of 16th instant, reveal an indifference on the part of refiners to operate largely in spot sugars, even at the present basis of 4e for 5d centrifugats, present stocks being ample in consequence of the limited demand for the refined product. On the other hand, the reports from various sources of abundant supplies of raw sugars in first hands, militates against the probability of higher prices in the immediate future. European markets, are weaker, and cable reports of the condition of the beet crops are indicative of a large yield. In refined the hand to mouth policy continues, and buyers are evidently holding off in expectation of a decline.

Latest Statistical Position—Willett & Gray report August 15, United States four ports, in all hands, estimated August 14, 200,940 tons, against 107,211 tons, same period last year. The excess of stock is 285,834 tons, against an excess of 320,811 tons last week, and a defi-

ciency of 86,983 tons December 27th, 1990.

Hamburg.—Shipments, 2,000 tons raw sugar to America from Hamburg and Breinen. 1,500 tons angagements. 1,000 tons refined shipped.

Raws.—The week under review has been very dull, the refiners showing little desire to operate and only accepting some small lots on spot or near at hand. The receipts were unusually light and stocks showed a reduction of 30,331 tons, but the refiners are still well supplied and receipts will bereafter increase. Our special cable from Batavia, received yesterday, reports exports of 23,00 tons, last month, to the United States, making a total of 170,000 tons now affoat, due to arrive during August and September, which are refled upon by refiners to replenish their stocks. Only about 39,000 tons of this quantity are unsold. It is replents their stocks. Only about 39,000 tons of this quantity are unsoid. It is rumored that one cargo of Javas was sold last week at 11s, 2½d, per cwt., c. l. f., due to arrive in about three weeks, being equal to 4.14c, duty paid. Another cargo has lately been sold on basis of 19s, 3d, c. l. f., about ready to sail, which we figure will cost 4.05c, for 96 degrees test duty paid. The latter cargo will be due to arrive about middle of October. Cuba is showing more disposition to sell, and actual beet sugars are offered for prompt delivery at 3d, below the cab.ed quotation for August contracts. Early in the week the last price of 4 5-32c, for 96 degrees test was paid but today holders showed weakness, with the result that a cargo of Centrifugals in store was sold at 4%c. Sugars were offered freely at the decline, but refiners refused to go on. The market closes dult and tending downward slowly.

Refined.-Early in the week the American Company reduced list quotations of all grades 10c., making the basis 5.3c. for Granulated, which had been the actual selling price for some time, and other refiners made their list to conform to same. All the refiners are firm on hards at list quotations, so that there is no change to note for the week, except that soft sugars are shaded 5 to 19 points. Prices are guaranteed to arrival and 7 days allowed for withdrawais. Shipments of most grades can now be made promptly. As the demand continues to be light, there is prospect of an accumulation of sugars in refiners' hands. In of prospects generally, buyers do not see any object to anticuand have adopted a hand to mouth policy. The refiners, however, give evidence of an intention to hold prices for the present, therefore, there are no indication of an immediate change. The next enange when it comes will doubtless be a

Coffee.-There is little or nothing new to report in regard to the coffee markets. Some fluctuations have taken place in the options quotations, but the business in this market has consisted largely of switching from the nearby positions to later months. The weight of supplies is more pronounced than ever, the American visible supply being 1,400,000 bags of Brazil coffee and about 400,000 bags mild grades. The world's visible supply increased nearly 700,000 bags during July, and it is supposed by many that the increase of world's visible supply for August will be about 1,000,000 bags. A Rio firm forecasts the August receipts 1,200,000 bags in Santos, 700,000 bags in Rio.

MAKE CUBAN SUGAR FREE

The people of the Hawalian islands have had the benefit of free sugar since 1876, the people of Porto Rico are now receiving the same benefit and the decisions of the Supreme Court indicate that the people of the Philippine Islands will soon be likewise favored. Why, then, should not the people of the United States receive the benefit of free sugar from Cuba? The total consumption of sugar in the United States last year was 2,219,847 tons, and based on the average increase of 6.34 per cent, during the past nineteen years, the consumption this year should be 2,300,585 tons. Of this quantity 1,000,000 tons in round figures will come from American sources, say Louisiana being able to produce 350,000 tons. United States beet factories 150,000, Hawaii 250,000 and Porto Rico 150,000, all being free of duty, leaving 1,360,585 tons to come from other sources and on which duty is paid. The average duty assessed is \$36 per ton, or a total of \$18. 981,060. The price of all the sugar consumed, however, being enhanced to the extent of the duty of \$36 per ton or a total of \$84,981,060, it is evident that \$36,000,000 additional is paid by the people, in order to provide the Government with forty nine millions for revenue, of which the Government is not now in need. If the duty is taken off Cuban sugar, the bene fit goes to the people.

COURT NOTES.

After an entire day spent in hearing arguments on a motion to instruct for the defendants in the case of Harrison vs. Magoon, Judge Gear yesterday altruoon averruled the motion, and the ase may go to the jury this afternoon The court held that the evidence will sufficient to be considered by the jury, and after the arguments today the case will be submitted in its merits.

LOVE DIVIDES UP ESTATE. An order was made by Judge Gear vesterday morning terminating the guardianship trust of James Love, and discharging J. Alfred Magoon as such guardian. An order was made requiring Mr. Magoon to turn over to Lose all the property of the trust as soon as he is paid whatever sum is coming to him from Love.

There is no reason why this spendthrift trust should exist; there was no reason for its creation in the first place," said the court in terminating the trust. "Mr. Love does not come within the statute and never did, and he should be discharged and will be discharged."

Following the discharge of Love from guardianship yesterday the old man, who has been having such a hard time all on account of his daughter, filed a trust deed with the recorder, by which Mrs. Hart is to get one-half of his estate it his death, the son in Japan to receive the remaining half.

The disposition of his property is made voluntarily and without agreement or compromise with anybody, and according to the terms of the instrument filed yesterday his estate is to be disposed of as follows: Love conveyed to Mrs. Hart and her brother the estate in the King street residence, the fee of which he presented to them years before being adjudged a spendthrift. This life estate is estimated to be of the value of \$4,000. He conveyed Mrs. Annie Roe in recompensation of her faithful service for seven years and his friendship and regard for her the Emma street property, valued a about \$9,000. The remainder of his property, valued at about \$50,000, he convey to George A. Davis as trustee. A por tion of this to be sold by the trustee and after paying a \$12,000 mortgage thereon, the balance is to be investe in mortgage loans; the interest, as wel as rents on unsold property, to be paid to Mr. Love during his lifetime, and a his death to be conveyed one-half to Mrs. Hart and one-half to Mr. Love's son in Japan. Of the proceeds of the \$12,000 mortgage, \$2,000 will go to set-tle Magoon's claims, \$5,000 will be retained by Mr. Love, and \$5,000 will be devoted to the payment of counsel fees

THE HABEAS CORPUS CASES. The Territory won a temporary vic tory vesterday in the Circuit Court in the two new habeas corpus cases. The case of Chida was first called and Deputy Attorney General Catheart filed a motion to quash, arguing then tha the petition was defective, in that i falled to particularize for whom it wa wanted, did not state who he is being held by, and did not say upon what or der he was discharged. Mr. Cathear argued further that the order of the court and the proceedings by which the first wrft of habeas corpus was granted should have been made a par of the petition. The court sustained this part of the argument, but refused to quash the writ, and advised the at torneys for the defendants to amentheir petitions. They are given until Friday morning to file the amended pa per, at which time the case is to be ar

WHEN THE MUSCLES BALK

When the muscles balk from strain or overwork almost unendurable pain follows as a natural consequence. Kickmanner that is marvellous to those who have suffered and found no help in the various so-called "pain destroyers." The action of the oil is magical. Its effects are miraculous. The pains re-sulting from neuralgia, sciatica, rheumatism, lumbago, pleurisy, from strains and pains, burns and bruises, are in-stantly controlled. One single applica-tion of the Oil will prove its power over pain in the most practical way, by bringing instant relief. Kickapoo Indian Oil is a preparation of rare barks, herbs and gums in combination with potent vegetable oils. It does not numbe the body into forgetfulness of pain as do most pain remedies, but by direct action on the inflamed parts, or diseased organs, fortifies them against the power of pain.
